Certification of Self-Sufficiency for the DARPA Grand Challenge

By signing this document, I certify the following statements to be true.

- The software and hardware used in my team's Grand Challenge vehicle if developed with Government funding is commercially available to the public (e.g., a global positioning system receiver).
2. If the hardware and software is proprietary to my team, it was not developed or purchased using U.S. Government funding either directly, through contract work, or indirectly, through U.S. Government-reimbursable accounts (eg. independent research and development, overhead, or general and administrative).
3. No person while preparing or operating my team's vehicle and systems for the Grand Challenge has received or is receiving compensation for these efforts in the form of salary or travel expenses paid for by U.S. Government direct contractual efforts or by reimbursable accounts (IR&D, overhead, or G&A).

I understand that a false certification will result in automatic disqualification from the DARPA Grand Challenge.

This signed certificate must be received by DARPA no later than January 9, 2004.

We believe that no team is violating any of the above restrictions. However if you are in doubt or just have a question, please contact Ron Kurjanowicz by phone (703-250-9317) or e-mail (rkurjanowicz@darpa.mil).
